

# UNIVERSITY POLICY FRAMEWORK HIERARCHY

## University-Wide Policies

University-wide policies govern the entire University system and override campus, college, and department policies.

### Board of Regents Policies

Board of Regents Policies serve as umbrella policies to provide high-level guiding principles and direction for the administration to implement. Board policies carry the Regents seal, are developed by the administration in consultation with the Regents, and approved by the Board

### Administrative Policies

Administrative Policies are developed by the administration and approved by the President's policy committee on behalf of the President.

Administrative policies provide specific rules and provisions for implementing Board of Regents policies and setting expectations for administrative operation of the University.

### Campus Policies

### College Policies

### Department Policies

## Non-University-Wide Policies

University campuses, college, and department may develop policies to govern their unique need, so long as they do not conflict with University-wide policies.
